# Preface

This printing represents the third major update to the NIOS documentation since the start of this project. Because the development of the NIOS client is on-going, you will find many changes in this document when compared to previous releases.

## Changes to Document Structure

In order to help make this document more useful and more available, it has been reformatted for electronic publishing.

A new chapter has been added -- Chapter 8 "Accessing an NLM from a Vxd".

## Changes To NIOS Functions and Macros

The following new NIOS functions have been added to this document:

- NiosVxdBeginNlmUse
- NiosVxdEndNlmUse
- NiosVxdGetVersion

The following new macros have been added to this document:

- NlmCall
- NlmJump
